IDENTIFIERS	*Food Webs

ABSTRACT

Whether animals are herbivores, carnivores, or omnivores, each one is part of an eternal food chain that carries on from one generation to the next. In this videotape, students learn more about terms like "predator," "pre-consumer" and "producer," as well as the cycles of food chains and food webs and how they support all of Earth's creatures. This videotape correlates to the following National Science Education Standards for Life Science: characteristics of organisms; life cycles of organisms; and organisms and environments. This videotape is accompanied by a teacher's guide and a hands-on student experiment. (CCM)
